

TDD Participant Prerequisites

We are very much looking forward to having you participate in TDD Training. A link to the meeting is provided in the course invitation email.

This is a hands-on workshop covering TDD in C#. Please take note of the laptop system requirements and follow the setup instructions below prior to training. If you have any issues or questions regarding set-up, please reach out to Josh Novak at josh.novak@leandogsoftware.com.

Required Software:

- Git
- .NET Core
- VS Code

Required Access:

Your laptop must have the capabilities and proper configuration prior to attending. If you do not understand what any of this is, please contact your company's tech support for help.

- Be able to install software on your laptop
(Local Admin in Windows, or Administrator in macOS)
